

Akhani Shaik

Software Development Engineer 3 · Front-End

+91-7893786004 · shaikakhani84@gmail.com · akhanishaikprotfolio.netlify.app · github.com/akhaniShaik · Bengaluru, India

SUMMARY

Front-end engineer with 5+ years of experience building responsive, high-performance web applications with React, Next.js and TypeScript. Currently an SDE-3 at IQVIA, leading the frontend architecture of a centralized KPI dashboard platform used across healthcare-analytics business units, with role-based access control and AI-assisted insights built on the Claude API and LangChain. Strong in reusable component libraries, state management, SSR/SSG, performance tuning and API integration, with solid testing and CI/CD practice. Comfortable leading frontend decisions, mentoring engineers and working closely with design, backend and product teams in Agile environments.

SKILLS

Frontend	React.js, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS, Material UI, Bootstrap, PWA, React Native
State & Data	Redux, Redux Saga, RESTful APIs, Axios, Headless CMS, Node.js
AI	Claude API, LangChain, natural-language querying
Testing & Quality	Jest, Enzyme, Playwright, Appium, K6 + Grafana, Allure Report, SonarQube, Sentry
CI/CD & Tools	GitHub Actions, Jenkins, Git, Webpack, Babel, Postman, Confluence, Agile/Scrum

EXPERIENCE

Software Development Engineer 3 (SDE-3) · IQVIA

05/2025 – Present · Bengaluru (Hybrid)

- Architected a centralized KPI Dashboard platform serving multiple IQVIA healthcare-analytics business units.
- Built role-based access control (RBAC) with granular permissions across user roles and dashboard modules.
- Developed the Goals & Targets page and multidimensional filters with trend comparisons.
- Integrated the Claude API and LangChain to deliver AI-assisted insights and natural-language querying of KPIs.
- Lead frontend architecture: shared component library, state-management patterns and API integration standards.

Software Engineer II · Apexon

04/2024 – 05/2025 · Bengaluru

- Led frontend development on the Aster Virtual Care platform using React.js, Next.js, Redux Saga and TypeScript.
- Implemented server-side rendering with Next.js to improve performance and SEO.
- Improved code quality and error handling with SonarQube, and set up Sentry for real-time monitoring.
- Mentored teammates and helped them through technical blockers, keeping the team collaborative and on schedule.

Software Engineer · Apexon (formerly Infostretch)

08/2021 – 03/2024 · Bengaluru

- Built features for Zaxbys and InterMiles with React.js, Next.js, Redux and TypeScript.
- Wrote unit tests with Jest and Enzyme, raising test coverage from 60% to 80%.
- Delivered mobile-responsive, PWA-compliant interfaces that improved user engagement.
- Used lazy loading, code splitting and caching to improve load times.

- Built reusable React components and a modular codebase, cutting maintenance effort by 40%.
- Wrote unit tests for React components, reaching a 90% pass rate in automated CI/CD pipelines.
- Worked with designers and backend developers for seamless integration and on-time releases.

PROJECTS

IQVIA KPI Dashboard Platform

05/2025 – Present

- Unified KPI dashboard for multiple healthcare-analytics business units, with RBAC, goals and targets tracking, and trend comparisons.
- AI-assisted insights and natural-language queries powered by the Claude API and LangChain.

Aster Virtual Care Platform

10/2023 – 05/2025

- MyAster app with Consult Doctor, ePharmacy and Home Care modules, connecting patients, hospitals, pharmacies and labs.
- Home Care lets users order nursing care, therapy and medical equipment to their doorstep. Appointment booking shows doctor availability, fees, facilities and reviews.

Zaxbys

02/2022 – 09/2023

- Responsive, scalable web app for US users, with SSR and SSG for performance and SEO.
- Optimized state management for real-time updates. Used lazy loading, code splitting and caching to improve speed.

InterMiles

08/2021 – 02/2022

- Mobile-friendly interface with API integrations for flight bookings, hotel reservations and lifestyle rewards.

SoulWallet

03/2021 – 07/2021

- Platform for comparing credit cards, loans and insurance using real-time financial data.

KEY ACHIEVEMENTS

Pat on Back Award: recognized for outstanding performance.

Best Team Member Award: recognized for contributions to team performance.

EDUCATION

MBA, Sri Krishnadevaraya University
06/2019 – 03/2021

B.Tech, JNTUA Engineering College
10/2014 – 05/2017
